We are here to make your digital services accessible

Thank you for trusting us to describe our offer, we hope it meets your expectations. Please do not hesitate to contact us if you have any questions about the document. Funka Academy is your knowledge provider to make all your digital services accessible.

Why is knowledge about digital accessibility important?

All successful accessibility work starts with knowledge. Funka is a global leader in the field of digital accessibility with over 20 years of experience. We know that knowledge is the best, easiest and fastest way to effective accessibility work. Therefore, we have started Funka Academy, a division within Funka that is completely focused on accessibility education and competence development.

Funka Academy offers a wide range of education and training in digital accessibility, from basic courses to advanced programmes for specialists. Through experience, research and innovation we constantly create new knowledge for your benefit.

A comprehensive and cutting-edge learning experience

The Funka flipped classroom

Funka is at the forefront of new ideas in professional education. We use a 'flipped classroom' approach to teaching and learning that reverses the traditional model of classroom instruction. Our courses are delivered through a unique blend of on-demand content and live sessions. This innovative model benefits our client organisations and ensures that all learners reach their learning objectives.

Two pedagogical delivery forms provide basics, immersion and application

On-demand courses via our digital platform

We have collected all our accessibility courses on a digital learning platform. The courses consist of self-paced films and complementary digital material. They are available on-demand, which means that employees in your organisation always have relevant and up-to-date knowledge at their fingertips. Knowledge that they can access at their own pace – whenever and wherever they want.

Description:

- Pre-recorded, relevant and always updated courses that provide broad knowledge in each course area.
- Interactive quizzes, Q & A, AI tutor and reference materials.
- The courses are between 25 minutes and 3 hours depending on the topic, divided into searchable short chapters of no more than 12 minutes.
- Video player with adjustable subtitles, magnification and speed to increase or decrease speech.
- Advanced AI powered search functionality to find answers to specific questions, terms or areas of the course
- In English with English subtitles. More than 30 languages available on request.
- Downloadable and shareable digital course certificate at the end of the course.

Live course sessions

Funka Academy's live course sessions provide the opportunity for immersion to increase employees' theoretical knowledge and for further development of practical skills. The sessions are a continuation and extension of the recorded on-demand courses.

The live sessions are particularly relevant for staff members who want a holistic understanding of the subject area. They are aimed at individuals and employers who appreciate the value of live interaction with lecturers, tutors and colleagues.

Description:

- The live sessions will broaden and deepen skills and develop practical abilities through application, discussion and exercises.
- The format provides plenty of opportunity for interaction and questions.
- Funka's accessibility experts act as lecturers and tutors throughout the session
- The live sessions are delivered online, 13:00 – 17:00 CET Central European Time making them available in many regions around the world. The Funka website offers a time zone selector, allowing you to adjust the course schedule to your local time.
- Downloadable and shareable digital course certificate at the end of the course.

Meet our accessibility experts and their digital twins!

At Funka, our focus lies in pushing the boundaries of accessibility training. This commitment has led us to introduce two versions of our accessibility experts – the real individuals themselves and their identical AI-generated digital twins. Through this innovative approach, learners gain the best of both worlds.

During the recorded self-paced section of the course, participants are guided by the digital version of our expert. These digital twins are meticulously crafted to embody the knowledge and expertise of our real accessibility professionals.

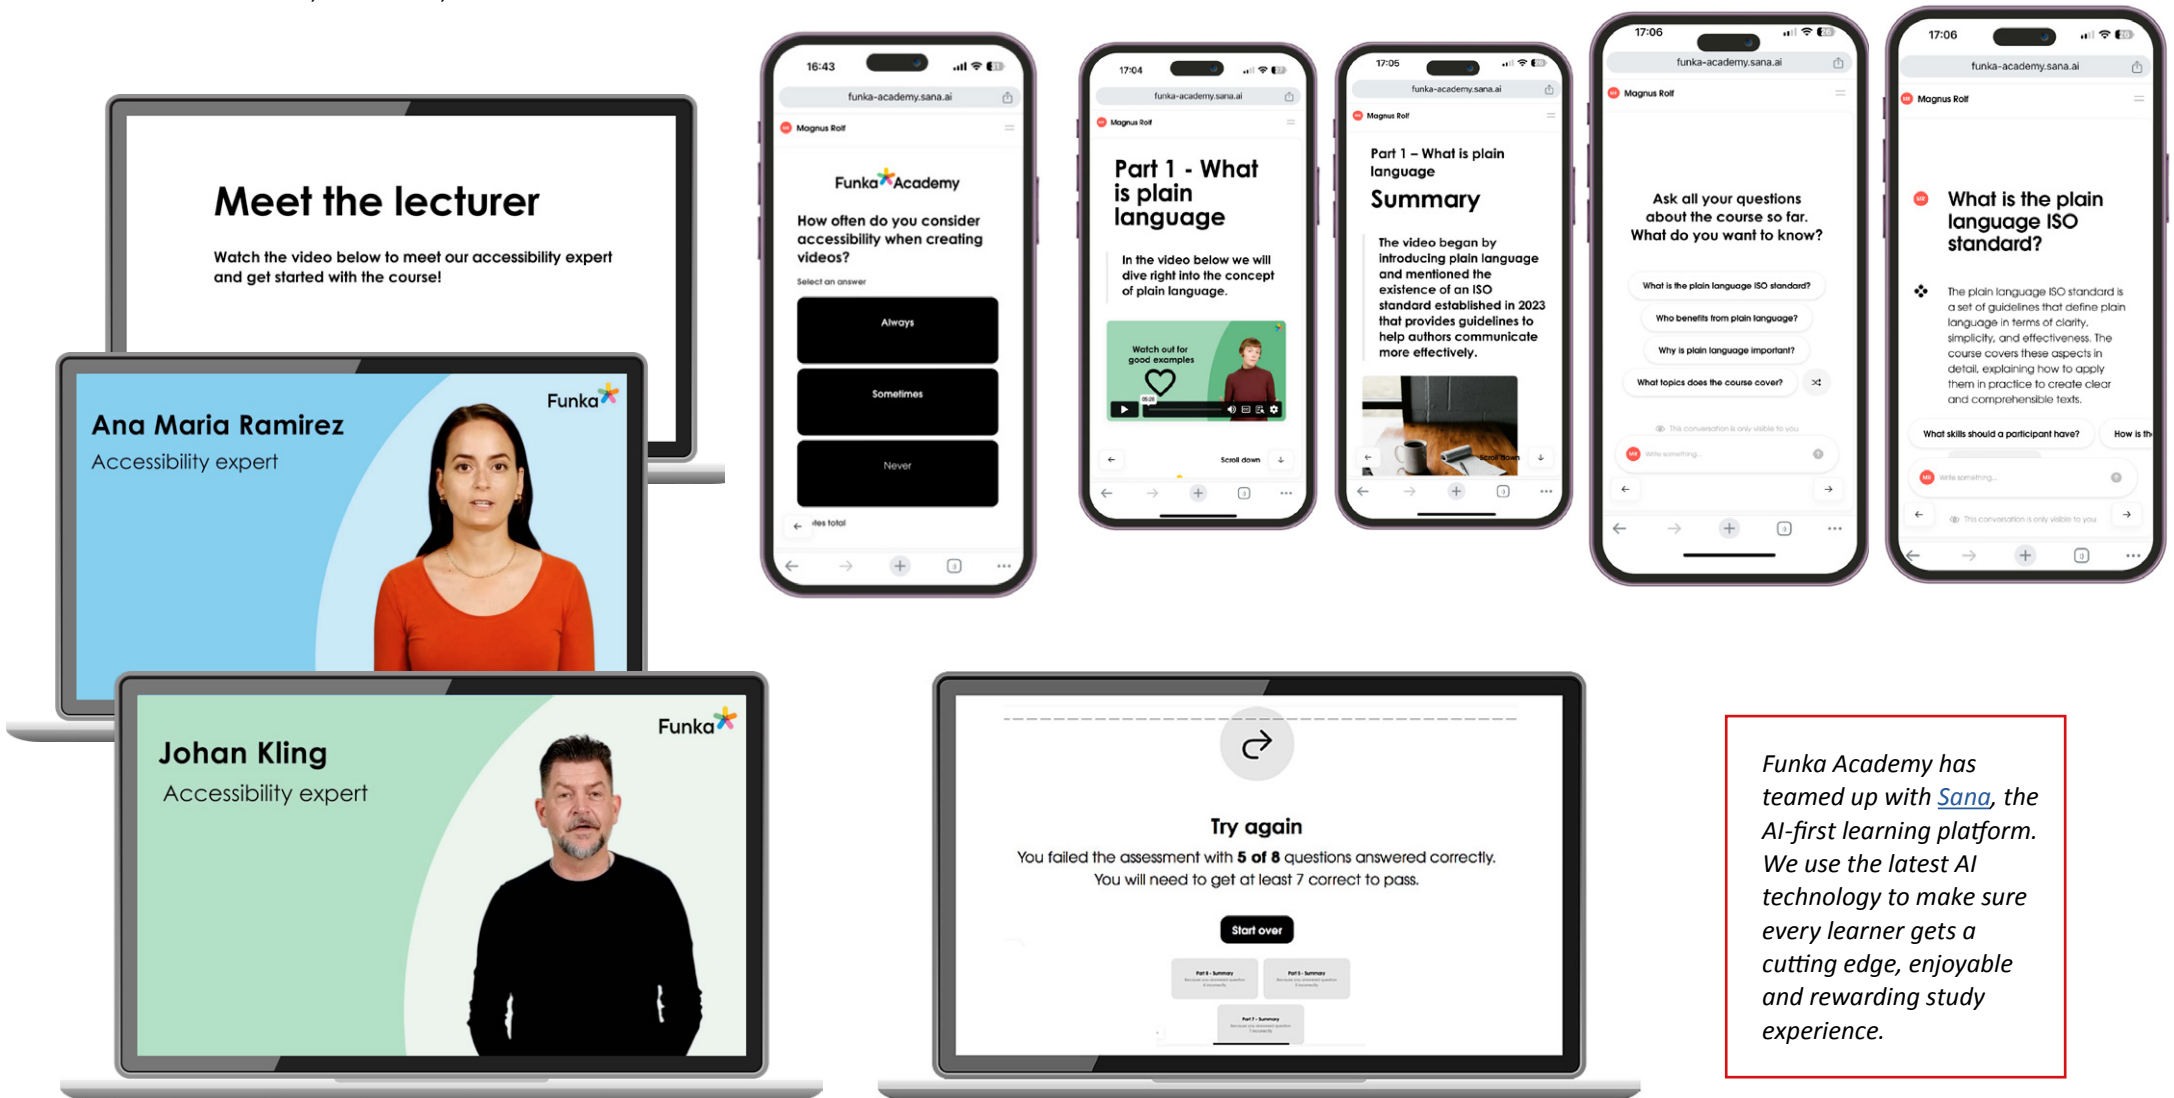

How do we achieve this seamless integration of real-time information? Our accessibility experts continually feed the latest accessibility news and legislation into their digital alter egos. This means that even when participants access the course at their convenience, they receive the most current insights and developments in the field of accessibility. For live sessions, our accessibility experts take the lead. Combining the expertise of our real professionals with the dynamic capabilities of their digital twins ensures a comprehensive and cutting-edge learning experience.

Ana Maria Ramirez, Accessibility Expert at Funka

Increase engagement through personalised learning

The Funka Academy courses are available on an end-to-end learning platform that centralises all knowledge, automates and scales training initiatives, and increases engagement through learning experiences that are relevant, interactive, and collaborative.

Funka Academy has teamed up with [Sana](#), the AI-first learning platform. We use the latest AI technology to make sure every learner gets a cutting edge, enjoyable and rewarding study experience.

Flexible range of single-subject courses and course packages for roles and functions

Courses

Funka Academy's subject courses cover the most important areas of digital accessibility. They are continuously updated to reflect developments, legislation and new research findings.

IAAP Approved Certification Training Preparation Provider

Funka is an International Association of Accessibility Professionals (IAAP) approved Certification Training Preparation Provider. This is a partnership between the IAAP and education programmes to support certification candidates with exam preparation. The approved training providers provide training content that addresses the knowledge and skills included in the IAAP exams overview content outline.

Offer for clients with over 200 users

Funka Academy courses via a SCORM connector

Funka Academy and our partner [Sana](#) offer an exciting opportunity for customers with more than 200 users. SCORM (Shareable Content Object Reference Model) is a tool which allows you to migrate courses between different LMS (Learning Management Systems) or LXP (Learning Experience Platforms), such as for example SAP SuccessFactors.

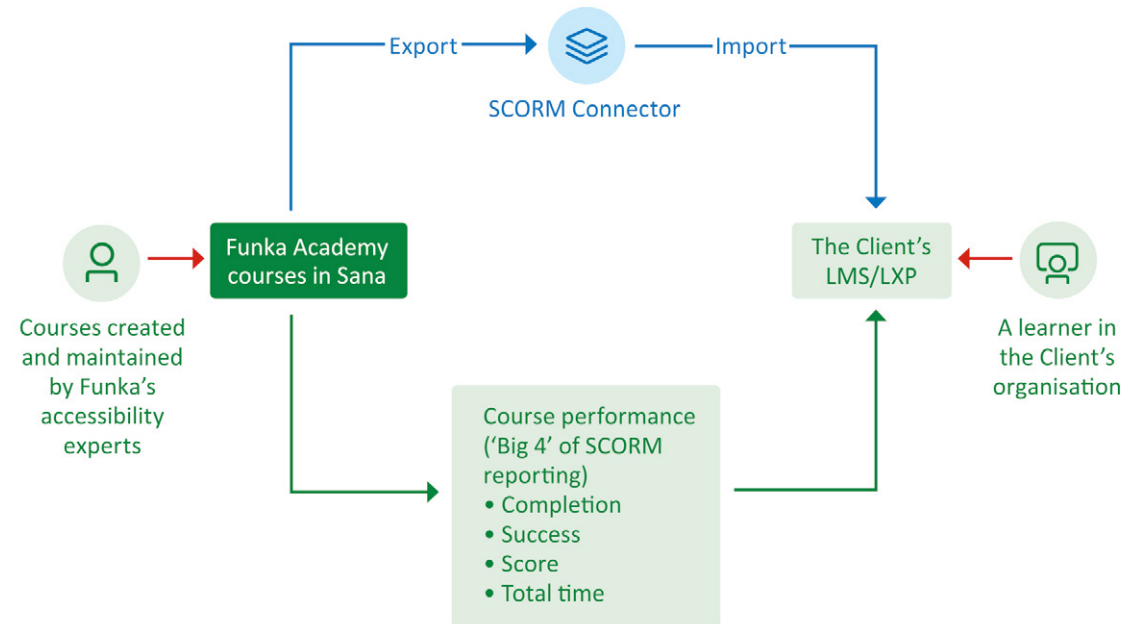

With a SCORM connector, any LMS/LXP can be seamlessly integrated with ours. This allows you to make the Funka Academy on-demand courses available to learners in your organisation, in your preferred format on your own LMS.

How does it work? The export of a Funka Academy course via a SCORM connector creates a shell file, which can be uploaded to your LMS/LXP to allow learners immediate access. When a learner launches the shell file in the LMS, they are authenticated to the course on the Sana servers to consume the content. As the learner progresses, key information is sent to your LMS/LXP, including Completion, Score, Time and Pass/Fail. Funka Academy and our partner Sana only get access to a pseudonymised user ID meaning we only process the minimum amount of data.

Moreover, users are seamlessly authenticated into the Funka Academy courses, no need for additional log-in mechanisms and multiple passwords.

At Funka Academy, we constantly revise the content of our courses to reflect changes in regulations and legislation. Through the SCORM connector, any such updates are immediately available to learners.

Funka Academy courses on your own Learning Management System

Fees, terms and conditions

Funka Academy's price model is shown on the next page. All courses and course packages are available for companies and organisations regardless of size and number of learners, from one to over 1000.

Let's discuss your accessibility training needs

Please feel free to contact our experienced team for a discussion how we can meet your particular learning and development requirements. Primary contacts:
